## PROFESSIONAL SUMMARY

Computer Science graduate (BSc, Karatina University) currently working as a Software Engineer, supporting and maintaining production systems, troubleshooting issues across application, database and server layers, and securing user data through authentication and access control. Hands-on experience with ERP systems (Odoo and Microsoft Dynamics 365 Business Central), MySQL/PostgreSQL databases, Linux, hosting and domain configuration, and cybersecurity fundamentals (Cisco Ethical Hacker). Strong at explaining technical issues to non-technical users and dependable under pressure. Keen to bring systems support and ERP experience to a healthcare ICT team and to deepen networking skills (LAN/WAN, TCP/IP) on the job.

## KEY SKILLS

**ICT Support & Troubleshooting:** First-level technical support, incident diagnosis and resolution, root-cause analysis, working with non-technical users, documentation
**ERP / Information Systems:** Odoo ERP (Sales, CRM, Inventory, Invoicing), Microsoft Dynamics 365 Business Central (AL), student management and loan repayment systems, data modelling
**Systems & Infrastructure:** Linux, hosting and domain configuration, deployment pipelines, Git/GitHub, Docker basics, AWS (EC2, S3), CI/CD basics
**Databases:** MySQL, PostgreSQL, SQLite, SQL, query optimisation, data integrity
**Security & Data Protection:** Token- and session-based authentication, access control, secure integrations, Cisco Ethical Hacker certification, awareness of data protection practices
**Software & Automation:** Python, Django, Flask, Node.js, PHP, C# (.NET), JavaScript/TypeScript, REST APIs
**Professional:** Analytical problem solving, clear communication, teamwork, time management, working under pressure

## PROFESSIONAL EXPERIENCE

**Software Engineer | Evu Ventures, Remote, New York | Jan 2026 - Present**

- Maintain and support production-ready services across Node.js and PHP, diagnosing and resolving cross-stack issues spanning application, database and frontend layers.
- Implement and troubleshoot authentication and payment-gateway integrations, using token-based and session-based flows to protect sensitive user data.
- Optimise MySQL/PostgreSQL queries and refactor legacy code to improve performance, stability and system availability.
- Work in a Git-based team workflow (pull requests, code reviews), communicating issues and fixes clearly to colleagues and stakeholders.

**AI Trainer | Mizani Innovation Hub, Nyeri, Kenya | Sep 2025 - Dec 2025**

- Delivered a 6-week bootcamp to beginners covering Python-based ML concepts, data fundamentals and prompt engineering.
- Supported learners hands-on with their tools and exercises, explaining technical concepts to non-technical audiences.
- Prepared interactive lessons and mini-projects, building strong communication and user-support skills.

**Web Development & ERP Intern | Softlink Options, Nairobi, Kenya | May 2025 - Aug 2025**

- Assisted in customising Odoo ERP modules (Sales, CRM, Inventory, Invoicing) to match business workflows.
- Managed website hosting, domain configuration and deployments; tracked performance metrics with Google Analytics.

**Software Engineer Intern | AppKings Solutions Ltd, Nairobi, Kenya | May 2024 - Aug 2024**

- Developed a student management module and a loan repayment system using C# (.NET) and MySQL, integrating front-end and back-end components.
- Applied data modelling and query optimisation to keep records accurate and queries fast.
- Worked on Microsoft Dynamics 365 Business Central customisation using the AL language.

## SELECTED PROJECTS

**Youth Financial Assistance System** (Jan - May 2023): savings and loan management system with relational data models and financial logic.
**Spagram 2.0** (Jan 2026 - Present): Next.js platform; resolved production Google OAuth/NextAuth authentication and environment configuration issues.
**Student Performance Prediction System** (2025): Scikit-learn classification model with EDA and evaluation (accuracy, F1-score).

**Intelligent Content Recommendation System** (Dec 2024 - Mar 2025): Django web app with a hybrid ML recommender (85% precision, 80% recall in simulated tests).

## EDUCATION

**BSc Computer Science** | Karatina University | Sep 2021 - Oct 2025

## CERTIFICATIONS

Ethical Hacker, Cisco (Dec 2025) | Certified Web Professional - Web Developer, eMobilis (Aug 2025) | AWS Educate Machine Learning Foundations (Jul 2025) | AWS AI Practitioner Challenge, Udacity (Apr 2026) | AWS AI & ML Scholars 2026, Udacity (Mar 2026) | Introducing Generative AI with AWS, Udacity (Jun 2025) | Claude 101 and AI Fluency: Framework and Foundation, Anthropic (Jul 2026)
