PROFESSIONAL SUMMARY

Computer Science graduate with practical experience in Python-based machine learning workflows, recommendation systems, exploratory data analysis, feature engineering, model evaluation, SQL databases, and API integration. Hands-on project experience using Pandas, NumPy, Scikit-learn, TensorFlow, and Django to prepare data, train and evaluate models, and expose predictions through application interfaces. Familiar with generative AI concepts, LLM applications, prompt engineering, and retrieval-augmented generation (RAG), with a software engineering foundation in Git/GitHub, debugging, documentation, and production-oriented backend development. Interested in building reliable AI solutions and expanding capability in enterprise ML platforms and MLOps.

AI/ML & TECHNICAL SKILLS

Programming & Data Analysis: Python, SQL, Pandas, NumPy, Jupyter Notebook, data cleaning, exploratory data analysis (EDA), data validation
Machine Learning: Scikit-learn, TensorFlow, classification, regression fundamentals, feature engineering, feature selection, model training, validation, hyperparameter-tuning concepts, precision, recall, F1-score
Generative & Agentic AI: LLM fundamentals, prompt engineering, embeddings and RAG concepts, document summarization concepts, AI-assisted development; familiarity with LangChain, LangGraph, OpenAI APIs and MCP concepts
ML Engineering & MLOps: Reproducible notebook workflows, model evaluation, experiment tracking concepts, model versioning concepts, inference APIs, monitoring and drift concepts
Data Platforms & Cloud: SQL databases, relational data modelling, AWS S3/EC2 and SageMaker fundamentals, GCP/Vertex AI exposure; foundational familiarity with Databricks, MLflow, Delta Lake, Azure Machine Learning and Azure Data Lake concepts
Backend & Data Systems: Django, REST APIs, Node.js, PHP, MySQL, PostgreSQL, SQLite, schema design, query optimisation, data integration
Engineering Tools: Git, GitHub, code review, debugging, Linux command line, Docker fundamentals, CI/CD concepts, technical documentation, AI coding assistants

PROFESSIONAL EXPERIENCE

AI Engineer | Mizani Innovation Hub | Nyeri, Kenya | Jan 2025 – Dec 2025

- Supported practical AI and machine-learning learning activities involving Python, data preparation, model training, Scikit-learn, and evaluation of model outputs.
- Developed and demonstrated hands-on exercises showing how structured data can be transformed into model inputs, predictions, and actionable insights.
- Applied data preparation and feature-oriented workflows, and helped troubleshoot issues encountered during practical AI exercises.
- Explained AI/ML concepts and model results clearly to learners, translating technical topics into accessible, task-focused guidance.

Software Engineer | Evu Ventures | Remote | Jan 2026 – Present

- Develop and maintain RESTful services across Node.js and PHP, applying structured API design, schema validation, and error handling.
- Optimise MySQL/PostgreSQL queries and refactor backend code to improve data access, application performance, and scalability.
- Investigate defects through cross-stack debugging and root-cause analysis; integrate authentication providers and payment services while maintaining reliable data flows.
- Collaborate using Git branches, pull requests, and code reviews in a team software-development workflow.

Web Development & ERP Intern | Softlink Options | Nairobi, Kenya | Aug 2024 – Dec 2024

- Worked with Odoo's Python-based framework and relational business data across Sales, CRM, Inventory, and Invoicing modules.
- Supported hosting, domain configuration, and deployment activities; monitored website performance metrics using Google Analytics.

Software Engineer Intern | AppKings Solutions Ltd | Nairobi, Kenya | May 2024 – Aug 2024

- Developed student-management and loan-repayment system modules using structured backend development practices.
- Integrated C#/.NET applications with MySQL, applying relational data modelling and SQL query optimisation.

SELECTED AI/ML PROJECTS

Intelligent Content Recommendation System | Python, Django, Pandas, NumPy, Scikit-learn

- Built a recommendation application using collaborative filtering and content-based approaches, with feature preparation using Pandas and NumPy.

- Evaluated recommendation quality using precision and recall, and exposed model outputs through Django endpoints backed by a relational database.

Student Performance Prediction System | Python, Pandas, Scikit-learn, Matplotlib

- Prepared and analysed structured academic and behavioural data for classification modelling.
- Performed EDA and feature selection, then assessed model performance using accuracy and F1-score.

EDUCATION

Bachelor of Science in Computer Science | Karatina University | Sep 2021 – Oct 2025

CERTIFICATIONS

- Claude 101 — Anthropic | Jul 2026
- AI Fluency: Framework and Foundation — Anthropic | Jul 2026
- AWS AI Practitioner Challenge — Udacity | Apr 2026
- AWS AI & ML Scholars – 2026 Challenge Completion — Udacity | Mar 2026
- Ethical Hacker — Cisco | Dec 2025
- Certified Web Professional – Web Developer (CWP) — eMobilis Mobile Technology Institute | Aug 2025
- AWS Educate Machine Learning Foundations — AWS | Jul 2025
- Introducing Generative AI with AWS — Udacity | Jun 2025
