PROFESSIONAL SUMMARY

Software Engineer building and maintaining RESTful services in Node.js, PHP, and Python/Django, backed by MySQL and PostgreSQL. Currently works on production backend systems at Evu Ventures, covering API design, query optimisation, authentication and payment integrations, and cross-stack debugging, and has led a team of developers through a migration from PHP/Next.js to Django REST Framework, React, and React Native. Computer Science graduate with experience across Django, Laravel, WordPress, and Microsoft Dynamics 365 Business Central, a solid foundation in Git-based team workflows and code review, and practical exposure to machine learning and AI-assisted development. Focused on writing reliable, maintainable, and scalable software.

TECHNICAL SKILLS

Languages: Python, JavaScript (Node.js), PHP, SQL, C#
Backend & APIs: Django, Django REST Framework, Laravel, Node.js, RESTful API design, schema validation, error handling, authentication provider and payment service integration
Frontend & Web: React, React Native, Next.js, WordPress
ERP & Business Systems: Microsoft Dynamics 365 Business Central (AL language), Odoo
Databases: MySQL, PostgreSQL, SQLite, schema design, relational data modelling, query optimisation
Engineering Practices: Git, GitHub, branching and pull requests, code review, debugging and root-cause analysis, technical documentation, Linux command line, Docker fundamentals, CI/CD concepts, AI coding assistants
Cloud & Deployment: AWS S3/EC2, hosting and deployment (Render, Plesk), domain configuration
AI/ML & Data: Pandas, NumPy, Scikit-learn, TensorFlow, prompt engineering, LLM APIs (OpenAI), LangChain, RAG concepts

PROFESSIONAL EXPERIENCE

Software Engineer | Evu Ventures | Remote | Jan 2026 – Present

- Led a team of developers in migrating from PHP/Next.js to Django REST Framework and React, with React Native for the mobile app.
- Develop and maintain RESTful services across Node.js and PHP, applying structured API design, schema validation, and error handling.
- Optimise MySQL/PostgreSQL queries and refactor backend code to improve data access, application performance, and scalability.
- Investigate defects through cross-stack debugging and root-cause analysis; integrate authentication providers and payment services while maintaining reliable data flows.
- Collaborate using Git branches, pull requests, and code reviews in a team software-development workflow.

AI Engineer | Mizani Innovation Hub | Nyeri, Kenya | Jan 2025 – Dec 2025

- Wrote and demonstrated Python exercises showing how structured data is transformed into model inputs, predictions, and actionable insights using Pandas and Scikit-learn.
- Applied data preparation and feature-oriented workflows, and troubleshot code and data issues that arose during hands-on AI development.
- Evaluated model outputs and explained technical concepts and results clearly to learners, translating complex topics into task-focused guidance.

Web Development & ERP Intern | Softlink Options | Nairobi, Kenya | Aug 2024 – Dec 2024

- Created websites using WordPress, including hosting, domain configuration, and deployment.
- Worked with Odoo's Python-based framework and relational business data across Sales, CRM, Inventory, and Invoicing modules.
- Monitored website performance metrics using Google Analytics.

Software Engineer Intern | AppKings Solutions Ltd | Nairobi, Kenya | May 2024 – Aug 2024

- Developed ERP solutions on Microsoft Dynamics 365 Business Central using the AL language, covering the student management system and the financial system.
- Integrated C#/.NET applications with MySQL, applying relational data modelling and SQL query optimisation.
- Developed student-management and loan-repayment system modules using structured backend development practices.

SELECTED PROJECTS

Safari Tours Booking Application | Laravel, PHP, Render

- Developed a Laravel-based safari tours booking application and deployed it on Render.

Spagram Platform | Next.js, Django REST Framework, React, React Native, Plesk

- Built the Spagram platform with Next.js and deployed it on Plesk.
- Led a team of developers to migrate the platform from PHP/Next.js to Django REST Framework and React, with React Native for the mobile app.

Intelligent Content Recommendation System | Python, Django, Pandas, NumPy, Scikit-learn

- Built a Django application delivering recommendations through collaborative filtering and content-based approaches, with data preparation in Pandas and NumPy.
- Exposed model outputs through Django endpoints backed by a relational database, and evaluated recommendation quality using precision and recall.

Student Performance Prediction System | Python, Pandas, Scikit-learn, Matplotlib

- Prepared and analysed structured academic and behavioural data for classification modelling, performing EDA and feature selection.
- Assessed model performance using accuracy and F1-score.

EDUCATION

Bachelor of Science in Computer Science | Karatina University | Sep 2021 – Oct 2025

CERTIFICATIONS

- Claude 101 — Anthropic | Jul 2026
- AI Fluency: Framework and Foundation — Anthropic | Jul 2026
- AWS AI Practitioner Challenge — Udacity | Apr 2026
- AWS AI & ML Scholars – 2026 Challenge Completion — Udacity | Mar 2026
- Ethical Hacker — Cisco | Dec 2025
- Certified Web Professional – Web Developer (CWP) — eMobilis Mobile Technology Institute | Aug 2025
- AWS Educate Machine Learning Foundations — AWS | Jul 2025
- Introducing Generative AI with AWS — Udacity | Jun 2025
